CLOPAY COMMERCIAL – MODEL 3722

energy series with intellicore®

POLYURETHANE INSULATED FLUSH STEEL DOORS

Clopay Model 3722 is for commercial and industrial facilities where demanding conditions require a rugged door that is also energy efficient.

- Intellicore® polyurethane insulation and thermal break for improved energy efficiency.
- Three-layer steel plus steel insulation enhances durability, strength and quiet operation.
- 3-stage paint process delivers a virtually maintenance-free finish.
- Injection-molded lite frames with integral weatherseal are durable and seal against the elements. Many glass options available for visibility, privacy or energy efficiency.

Panels are prepainted inside and out to inhibit rust. Hot-dipped, galvanized steel is painted with primer and given a tough oven-baked polyester top coat to provide the most rust-resistant steel door available. Ten-year warranty against rust-through.
