ACCENT the beauty of YOUR HOME

A guide to choosing a garage door as beautiful as your home
Clopay, the right choice for your home.

- Clopay is North America’s largest and most trusted garage door brand
- A garage door can represent as much as 30% of your home’s front façade, which makes choosing the right design especially important – and Clopay has the widest selection available
- Clopay garage doors are designed and manufactured in the USA
DESIGN, VISUALIZE AND PURCHASE A NEW CLOPAY GARAGE DOOR

Use the Garage Door Configurator to design from any of your devices.

Upload a photo of your home. See which style offers you the look you want. With just a few simple clicks, you can visualize the transformation and make it a reality.

homedepot.com/garagedoors
CHOOSE YOUR GARAGE DOOR SIZE
Garage door sizes are generally categorized as single or double car doors.

Single Car Door
Double Car Door
Choose Your Collection

- Classic raised panel steel doors
- Available in our BASIC, GOOD, BETTER and BEST construction options

Choose Your Construction
The construction and insulation type improves energy efficiency, durability and noise control of the door

Best
- Our BEST construction is made using 2" Intellicore® insulation between two layers of steel.
  \[ R\text{-Value}^* = 18.4 \]

Better
- Our BETTER construction is made using 1-3/8" Intellicore® insulation between two layers of steel.
  \[ R\text{-Value}^* = 12.9 \]

Good
- Our GOOD construction is made using 1-3/8" polystyrene insulation between two layers of steel.
  \[ R\text{-Value}^* = 6.5 \]

Basic
- Our BASIC construction is made using one layer of durable steel.
  \[ R\text{-Value}^* = 0.0 \]

*Calculated door section R-value is in accordance with DASMA TDS-163.

NOTES: Please note that Reserve® Wood Collection, Canyon Ridge® Collection and Avante® Collection doors are available ONLY professionally installed.

HOW TO MEASURE YOUR DOOR

1. Measure existing door width and height in feet and inches. This determines the size of door needed. The rough opening should be the same size as the door.
   Width: ____________________________
   Height: ____________________________

2. Measure for sideroom: 4-1/2" is required on each side for installation of the vertical track for standard extension or torsion springs, or EZ-SET® torsion spring. 5-1/2" is required for EZ-SET® extension spring.
   Sideroom: ____________________________

3. Measure area labeled “headroom” – distance between the top of the door opening (jamb header) and the ceiling or lowest obstruction (e.g., opener, beams or light fixtures). 10” is required for standard installation of extension springs and EZ-SET® extension spring; 12” on standard torsion springs and EZ-SET® torsion spring. 14-1/2” of headroom required for carriage house doors. If you have restricted headroom, special hardware is available.
   Existing headroom: ____________________________
   Headroom required: ____________________________

4. Measure area labeled “backroom” – distance is measured from the garage door opening toward the back wall of the garage.
   Backroom: ____________________________

Common garage door sizes include 8’ wide x 7’ high, 9’ wide x 7’ high, and 16’ wide x 7’ high. Clopay manufactures most doors in nearly any size you require.
